**FILM THICKNESS/
LITRE/COAT**

Wet: 60-70 micrometers

Dry: 25-30 micrometers

DRYING TIMES

Touch Dry

Single coat at standard film thickness

Recoat

Dependent on temperature and humidity

2-3 hours

APPLICATION

Brush

Roller

THINNING

Brush

For application with brush thinning should not exceed 2-3 parts of clean water to 4 parts of paint (60-70%).

Roller

For application with roller thinning should not exceed 0.5-0.75 parts of clean water to 4 parts of paint (10-15%)

CLEANING UP

Clean all equipment with clean water immediately after use

PRACTICAL COVERAGE

A guide to the practical coverage which can be achieved under normal conditions is 13-15m²/litre /coat.

SURFACE PREPARATION

New surfaces must be clean, dry, free from all defective or poorly adhering material, dirt, grease, wax etc. Treat any area affected by mould, lichens, algae or moss with Aquashield Pre Treatment Coat. Previously painted surfaces should be thoroughly rubbed down using a suitable abrasive paper and then dust off.

FILLING NEW SURFACES

After priming new surfaces with Dulux Promise Primer, fill the surface with Promise Wall Putty. Please refer to SDS of Promise Wall Putty for correct application procedure and drying time properties. Third coat of Promise wall putty can be applied for extra smoothness. For best results apply one coat of Dulux Promise Primer again over wall putty and dry overnight.

POWDRY, DUSTY SURFACES DEFECTS, CRACKS AND OTHER SURFACES

Repair minor defects in the wall using sand whereas for larger holes and cracks use cement mix. Allow the surface drying time. Prime surface with Promise Primer and then fill any surface imperfections with the Promise Wall Putty. Scuff surface using abrasive paper and dust off.

SYSTEM INFORMATION

New surfaces

- i) **Primer:** Dulux Promise Primer(F912-9595) (1 coat) ii) **Putty:** Dulux Promise Putty (F962-9596) (2-3 Coats) iii) **Primer:** Dulux Promise Primer(F912-9595) (1 coat)

Finish (3-4 coats)
